

BUILT TO LAST AND OUTPERFORM CONVENTIONAL CONCRETE PADS

Custom housekeeping pads can be cast for any specific application and designed to reduce onsite preparation and installation costs.

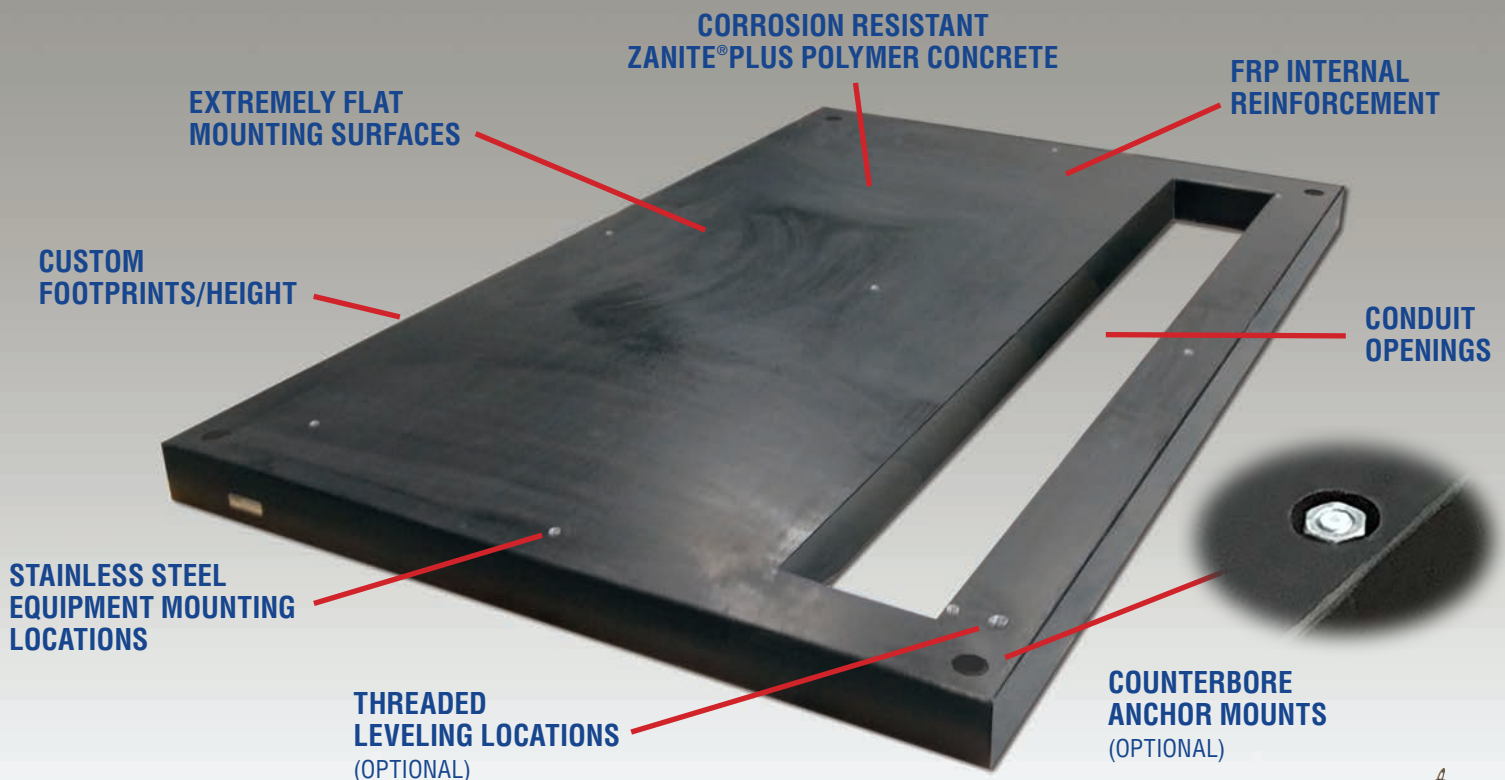

Typical applications include custom dimensioned housekeeping pads to raise utility or telecommunication cabinets and enclosures off the floor or ground to protect them from moisture and allow for easy access.

Stainless steel threaded holes can be cast to location providing a noncorrosive, nonconductive, mounting pad for equipment.

Zanite® Plus polymer composite pads are built to last and will outperform conventional concrete pads in every way.

WE GUARANTEE IT.

PRECAST POXYBASE® EQUIPMENT PADS

ADVANTAGES OF POXYBASE® PADS

Labor Saving

No forms or field pour required

Quick Installation

No waiting for concrete to cure

Easy Mounting

Stainless threaded holes for equipment and floor anchors

Flexible Designs

Built to custom footprint

Built to Last

Corrosion resistant with no upkeep required

Seismic Ready

Durable for most every environment

PRECAST HOUSEKEEPING PADS

FLATNESS	✓	0.030" PER FOOT
CORROSION RESISTANCE	✓	EXCELLENT
DEFLECTION	✓	RIGID – WILL NOT BEND
RAPID INSTALLATION	✓	FASTEST
INSTALLED COST	✓	LOWEST

Multi-Cavity

COMPRESSIVE STRENGTH 18,000 PSI

DENSITY 0.081 lb/in³

TENSILE STRENGTH 1,900 PSI

WATER ABSORPTION 0.01%

FLAME SPREAD INDEX Class A (Class I)
25 or under flame spread per ASTM E84
